

Automotive Parts Manufacturers

Microsoft Dynamics AX Industry Business Solutions

Market dynamics are changing the relationship between OEMs and their supply-chain partners. Automotive OEM companies are requiring suppliers to identify areas for further cost reductions, take a larger stake in investment costs and other risks, and provide greater engineering and technical support. Suppliers are now responsible for greater investment and validation of a vehicle. OEMs and suppliers must work closer together, recognize and understand each other's needs, and create a foundation of trust that will result in mutual benefit.

Winfosoft provides offers a powerful set of applications and services for automotive parts manufacturers. These integrated solutions can be deployed quickly and inexpensively, without complicated customizations and drawn-out complex projects.

Benefits of Microsoft Dynamics AX

Microsoft Dynamics AX helps automotive suppliers achieve real-time collaboration while supporting lean best practices, responding quickly to customers, complying with changing regulations and competing globally.

- Improve Operations and reduce costs by supporting a variety of Release accounting methods, including cumulative order management, Kanban, and long-range forecasting 830 Production Release Transactions
- Lower costs with systems to support lean manufacturing capabilities such as: Just-in-Time (JIT) Production; Continuous Flow, Production Leveling, Pull System and Takt Time; Supply Chain Collaboration; Visual Management; Mixed-Mode Operations
- Measure and deliver industry and customer specific KPIs and business intelligence to all with easy-to-use and familiar software
- Build Connections to suppliers and vendors to drive transparency down the supply chain to the 2nd and 3rd tier suppliers directly from auto makers' forecasts
- Shorten development cycles by integrating product development to manufacturing, accounting, purchasing and suppliers
