

Microsoft Dynamics AX Industry Business Solutions

The Consumer Goods industry is remarkably diverse. Thousands of different products and types of processes serve customers ranging from mega retailers to small chains, and independent stores, Manufacturers must respond to the demands of retailers and customers, manage supply chain processes, and make sure delivery times and schedules are coordinated. Distributors must manage costs with increased demand from the manufacturer and customer.

Winfosoft offers a powerful set of applications and services for consumer goods manufacturers. These integrated solutions can be deployed quickly and inexpensively, without complicated customizations and drawn-out complex projects.
