

Microsoft Dynamics AX Industry Business Solutions

Professional services organizations (PSOs) are faced with the challenge of delivering increased customer value in the face of rising cost pressures. Increasing use of global service delivery models present quality control and project management challenges. Clients demand more value for money and faster service. A mobile and decentralized workforce needs to be linked to firm processes and culture. PSOs must orchestrate extensive amounts of information in different formats and from disparate sources.

Microsoft Dynamics AX Provides the Solution for today's Professional Service Organizations.

Professional Services
